***Claim Rejections - 35 USC § 102***

Claims 32,35,39 and 40 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Japanese publication 2001-012172.

Looking at Fig. 6, the left end is the first end of the rail and the right end is the second end of the rail. See first operating device 6 and second operating device 5. See first master carrier 2c of the left most group of slats and second master carrier 2a. Operating first operating device 6 moves the first master carrier toward the right, or second, end, leaving a space under the left end, and operating the second operating device 5 moves the second master carrier 2a toward the first, or left, end, leaving a space under the right end.

***Claim Rejections - 35 USC § 103***

Claims 33,34,41 and 42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese publication 2001-012172.

The particular arrangement of the cords is clearly a matter of choice of design motivated by space requirements of the headrail.

***Allowable Subject Matter***

Claims 30,31 and 43 are allowed.

***Response to Arguments***

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.
